SKILLS

HTML   CSS   ReactJS   JavaScript   React-native

Core Java   AngularJS   NodeJS

PERSONAL PROJECTS

Contributed to OpenSource (06/2021 - 07/2021)
- Contributed to the website to maintain the responsiveness of the website.
- https://redhood.in/

Online Portfolio
- Built on GatsbyJS using ReactJS & GraphQL. The website is deployed on netlify.com the link can be found above. More pages and development has to be added.
- Avinash Sharma (avinash-sharma.netlify.app)

COVID-19 Tracker (LIVE)
- Learned about handling api.
- Website: covid-19live-world-status.netlify.com

Crypto Tracking application
- Build on reactjs, had a good time to structure the project and had a hands on with react-redux-toolkit. Also used rapid api for data to display, used Chart.js to display the line graph and used antd.
- the application is responsive as well
- Website: https://best-crypto-tracker.netlify.app/

UX Designs
- I have started working on UX design using figma and Adobe XD whenever i am free.
- A few of them are uploaded to dribbble.
- https://dribbble.com/avinaash_sharma

Note: All the above mentioned projects and many other projects can be found on the "github" link provided in the header.
- there are many more projects available on github link.
